

# KILIX Decode Battery Solutions for iOS17.4

## Blocks the Battery SOH(State of Health) Update

iOS		KILIX decode battery + original BMS
iOS 17.3 & before		No "Unknown Part" message, 100% Maximum Capacity
iOS 17.3 & before update to iOS 17.4		No "Unknown Part" message, 100% Maximum Capacity
Upgraded iOS17.4 and then replace a Kilix Decode Battery	Problem	No "Unknown Part" message, Historical battery health information (Actual health is 100%, doesn't affect battery use)
	Solution	Battery health on iPhone shows old data, but by 3uTools, actual capacity 100% can be seen. Flashing the phone system with 3uTools, battery health will show 100% (The iPhone' data will be erased, need to backup the data before flashing)

### STEP1:

Make sure the battery health is 100% on 3uTools. If not, check the installation of decode battery.

### STEP2:

Flashing the phone system with 3uTools, battery health will show 100% ( The iPhone' data will be erased, need to backup the data before flashing )
